

Act concerning the Territorial Waters of Sweden of 3 June 1966
(with amendments No. 959 enacted on 18 December 1978,
and No. 1140, on 20 December 1979)

...

Section 4

In the case of land areas, the baseline from which the territorial sea is measured is the low-water line along the coast. The territorial sea, however, is measured from skerries which rise above sea level at low-water level but not at mean water level, only if the skerries are not more than twelve/nautical miles from the land areas belonging to Sweden which are visible above water surface at mean water level.

As regards internal waters along the coast, the territorial sea is measured from the outer boundaries of these water areas (straight baselines) unless such measurement is to be done in some other way because a land area is situated outside a straight baseline.
