

COMISIÓN PERMANENTE DEL OcéANO PACÍFICO

Comisión Permanente

para el Pacífico Sur

3. Finally, underline the need for the Regional Office of the UN Environment

to support the work of the Regional Bureau in the framework of the Lima Convention. This would mean a further increase in the technical cooperation between the two organizations. The UN Environment should also support the activities of the Regional Bureau in the framework of the Global Environment Facility, which has been established to support the efforts of the countries of the SROP region for the unequal distribution of the benefits and costs of environmental management of the atmosphere.

4. Under the umbrella of the SROP, the Regional Bureau should

concentrate its efforts on the following areas:
a) Environmental education and training.
b) Environmental information systems.
c) Environmental impact assessment.
d) Environmental planning.
e) Environmental management systems.
f) Environmental monitoring and evaluation.
g) Environmental research and development.
h) Environmental standards and guidelines.
i) Environmental legislation.
j) Environmental policy and strategy.
k) Environmental management systems.
l) Environmental impact assessment.
m) Environmental planning.
n) Environmental monitoring and evaluation.
o) Environmental research and development.
p) Environmental standards and guidelines.
q) Environmental legislation.
r) Environmental policy and strategy.
s) Environmental management systems.
t) Environmental impact assessment.
u) Environmental planning.
v) Environmental monitoring and evaluation.
w) Environmental research and development.
x) Environmental standards and guidelines.
y) Environmental legislation.
z) Environmental policy and strategy.

5. Under the umbrella of the SROP, the Regional Bureau should

concentrate its efforts on the following areas:
a) Environmental education and training.
b) Environmental information systems.
c) Environmental impact assessment.
d) Environmental planning.
e) Environmental management systems.
f) Environmental monitoring and evaluation.
g) Environmental research and development.
h) Environmental standards and guidelines.
i) Environmental legislation.
j) Environmental policy and strategy.
k) Environmental management systems.
l) Environmental impact assessment.
m) Environmental planning.
n) Environmental monitoring and evaluation.
o) Environmental research and development.
p) Environmental standards and guidelines.
q) Environmental legislation.
r) Environmental policy and strategy.
s) Environmental management systems.
t) Environmental impact assessment.
u) Environmental planning.
v) Environmental monitoring and evaluation.
w) Environmental research and development.
x) Environmental standards and guidelines.
y) Environmental legislation.
z) Environmental policy and strategy.

Southeast Pacific, in the framework of the Lima Convention, the Regional Bureau should:

a) Environmental education and training.
b) Environmental information systems.
c) Environmental impact assessment.
