concentration level of 50mg/kg or more, plastic waste and waste pneumatic tyres. The Harmonized System Committee has provisionally adopted amendments to the Harmonized Commodity Description and Coding System with respect to these three types of wastes.

(c) E-waste amendments

25. The Parties to the Basel Convention, taking into consideration the growing concern regarding the challenges in the environmentally sound management of e-waste, at the fifteenth meeting of the Conference of the Parties in 2022, adopted a decision to amend annexes II, VIII and IX of the Convention, listing both hazardous and non-hazardous e-wastes in the Annexes of the Convention (BC-15/18). The amendments require that all e-wastes, hazardous and non-hazardous, are subject to the Convention's provisions on the control of transboundary movements through its Prior Informed Consent Procedure (PIC). Paragraph 2 42:

Moreover, the global monitoring plan data warehouse¹⁰ serves as a valuable resource, facilitating widespread access to information on POPs monitoring.

31. Furthermore, the Secretariat actively engages with the broad spectrum of stakeholders to advance international research efforts concerning the fate and impacts of marine plastics and microplastics. This collaboration includes participation in Working Groups 40, 43, and 45 of the Group of Experts on the Scientific Aspects of Marine Environmental Protection (GESAMP).
