Summary and monitoring timeline

Angola: Sustained high income despite low international oil prices. High inflation. Human assets are improving but are still at very low levels. The government initiated the preparation of the smooth transition strategy.

Equatorial Guinea: Sustained high income despite low international oil prices. Limited diversification and slow improvement in human assets.

Samoa: Slowing growth and high vulnerability. Receiving smooth transition support on trade (Everything But Arms (EBA) and Enhanced Integrated Framework (EIF)) and development financing (Least Developed Countries Fund (LDCF)).

Vanuatu: Income growth is recovering from impact of the cyclone, but economic vulnerability remains high. The government needs to start negotiation with trading partners on preferential market access.
