

PEOPLE'S REPUBLIC OF CHINA

urbanization and changes of population distribution and their impacts on development, the Chinese delegation would like to present and share the following viewpoints and recommendations:

Firstly, Governments should include urbanization and population

[The rest of the page contains extremely faint and illegible text, likely due to the quality of the scan or the nature of the document.]

As the world's most populous developing country, China is undergoing an all-around and accelerated process of urbanization and migration with the largest population in history.

PEOPLE'S REPUBLIC OF CHINA
MISSION TO THE UNITED NATIONS

socialist market economy system, such migration and mobility of the population will be further intensified. It is estimated that in the next 20-30 years, there still will be over 300 million migrating from rural to urban areas, pushing urbanization rate up to 53% in 2020. While the population reaches its peak, urban population will clime to 1 billion.

According to the 2005 survey data, population migration will be 1.125

pressure on employment and social security; persistent institutional

population. Migrants with steady jobs and residences in priority development areas should be encouraged to settle down; while key development zones should be incentivized to accept migrants in a
