

Statement by H. E. Amba

billion US dollars, to promote family planning, health education and HIV/AIDS prevention. It has been followed by various additional assistance packages focusing on sexual and reproductive health, maternal and child health, and the empowerment of women.

There may be no miracle solution. But one key element should be ensuring healthy lives for all at all ages. Throughout our life cycle, from childhood to adulthood to old age, health and wellness are human needs. The promotion of work-life balance, family friendly environments, coupled with measures towards gender equality, and the implementation of appropriate health systems as seen through the goals of UHC, should be essential components of our strategy.

Japan is ready to share its experiences and extend its support in this regard.

Thank you very much for your kind attention.
