

Campaign Goal

Y To increase the coverage rates for prevention of PMTCT (vertical transmission) and pediatric treatment services from the current rates of 30% to 40% to the globally agreedupon target of 80% and ensure highquality services.

Strategic Objectives

- Y Family-Centered Care and Nutrition.
- Ÿ Early Infant Diagnosis and Treatment.
- Ÿ Access to Appropriate Medications.
- Y Full Funding to Eliminate Pediatric HIV/AIDS
- Y Stigma and Discrimination : As a cross cutting theme.

CEPA Network will

- Y Leverage policy reforms at both global and country levels.
- Ÿ Expand and activate in-country advocacy networks.
- Y Hold governments and decisionmakers accountable for tangible progress toward their policy commitments.

Our Focused Countries...

- Ÿ Tipping Countries:
- Uganda
 Kenya
- Tanzania
 Zambia
- Nigeria
 Mozambique
- Transition Countries:
- Ÿ Ethiopia Ÿ Malawi
 - South Africa
- Rwanda

The Initiating Partners:

> African Network for Care of Children

Current state of affairs

Ÿ 100,000-150,000 children infected with HIV (projection estimates)

Ν

- Ϋ́ 1.5million births annually
- Ÿ HIV prevalence among ANC 6.9%
- Ÿ 100,000 infants exposed to HIV annually

- Y Average MTC transmission rates (10-15% from EID data)
 Y 19,000 annual infections through MTCT –Cut Down by 80% in two years.....

Ż	The global Financial Crises and its
	impact on local economy;
Ÿ	On-going bureaucratic conflicts between (Two Ministries of health)
Ÿ	Corruption and its implication on funding;
Ÿ	Food security and changing climate dynamics

ACTION

- Ÿ No child in Africa should be born HIV+
- Y Lets use the basic rich cultural norms that we have in place
- Y Let the African Governments walk the talk and put 15% of budget to health
- Y Of the 15% lets come up with a % going specifically to the mother and child interventions
