What are the data and appropriate levels of disaggregation (rural/urban; gender; population groups) required for effective national reporting on development progress, especially for the emerging development agenda?
How can innovations in data sources and tools be used to overcome measurement limitations and improve comparability across countries? What are the technical support needs?

We look forward to your insights and concrete examples to help illuminate your points, and wish you all a fruitful and stimulating discussion!

Kind regards,

Shantanu Mukherjee, Policy Adviser, Bureau for Development Policy, UNDP

Matthhias Reister, Senior Statistician, Office of the Director, Statistics Division, United Nations Department of Economic and Social Affairs (UN DESA)
