These two factors are the subject of the  
present study. The first is the  
effect of the amount of time spent  
in the office on the productivity of  
the employees. The second is the  
effect of the amount of time spent  
in the office on the productivity of  
the employees.

The first factor is the amount of  
time spent in the office. The second  
factor is the amount of time spent  
in the office. The amount of time  
spent in the office is the independent  
variable.

The second factor is the productivity of  
the employees. The amount of time  
spent in the office is the independent  
variable. The productivity of the  
employees is the dependent variable.

The amount of time spent in the office  
is the independent variable. The  
productivity of the employees is the  
dependent variable.
