Dear colleagues,

Estonia lines up with the general position brought up by EU during the session. Compared to the global level Estonia has no remarkable mineral resources. However, it is essential in the local level and might be of interest on global level.

It will be important to address this dependence on fossil fuels.

It will be important to address this dependence on fossil fuels, as it will address our energy needs, especially in the context of the energy transition and the need for energy security.

Energy resources are being used efficiently and with the minimisation of other environmental

resources are being

Increased demand of oil, especially during the winter, has led to a significant increase in the price of oil. This has led to a significant increase in the price of oil, which is a major concern for Estonia. The government is looking for ways to reduce the dependence on oil and to diversify the energy sources.

of production. In Estonia, we have developed unique new

energy sources and we are working to make them more efficient and to reduce the

impact and costs. As the

energy transition progresses, we will need to focus on developing new energy sources and on improving the efficiency of our energy systems.
