

Bangladesh is recognized worldwide as one of the most vulnerable countries to the impacts of global warming and climate change. This is due to its unique geographic location, dominance of floodplains, low elevation from the sea, high population density, high levels of poverty, and overwhelming dependence on nature, its resources and services. The couvuserlevoltuype0 -1.257TD-.0014 Tc.

The number of families and villages who lose their homes permanently to rivers every year are perhaps one of the highest in Bangladesh. It has been reported that many of the slum dwellers in the metropolitan areas are the victims of riverbank erosion.

The security in the context refers to both 'freedom from want' aspects of human security (e.g. livelihood security, food security, health security, water security and environmental security) and
