10. The following table shows the number of hours worked by 100 employees in a company.

It is also important to note that the results of the study were not statistically significant, which suggests that the observed differences may not be meaningful.

Figure 1. Schematic diagram of the genome organization of *Yersinia pestis* KIM-1. The genome consists of a single large circular chromosome (1,043,943 bp) and two small plasmids (pPCP1 and pYV).

Figure 1. Schematic diagram of the experimental setup. The light source (laser) emits light at  $\lambda = 532$  nm. The beam splitter (BS) splits the beam into two paths. The first path contains a lens (L<sub>1</sub>) and a polarizer (P<sub>1</sub>). The second path contains a lens (L<sub>2</sub>) and a polarizer (P<sub>2</sub>). The two paths converge at a point where they are imaged by a camera (C). The camera is connected to a computer (PC) for data processing.

Figure 1. Schematic diagram of the experimental setup. The laser beam (blue arrow) is focused onto the sample surface (red arrow) through a lens system consisting of lenses L<sub>1</sub>, L<sub>2</sub>, and L<sub>3</sub>. The scattered light (green arrow) is collected by lens L<sub>4</sub> and focused onto the entrance slit of a spectrometer (S). The spectrometer is connected to a computer (C) for data processing.

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits light at  $\lambda = 532$  nm. The beam splitter (BS) splits the beam into two paths. The first path contains a lens (L<sub>1</sub>) and a polarizer (P<sub>1</sub>). The second path contains a lens (L<sub>2</sub>) and a polarizer (P<sub>2</sub>). The two paths converge at a point where they are imaged onto a camera (C). The camera captures the interference pattern.

Figure 1. A schematic diagram of the experimental setup. The left panel shows the optical bench with the laser source, lenses, beam splitter, and mirrors. The right panel shows the optical bench with the beam splitter, lenses, and mirrors.

Complexity and Efficiency of Parallel Processing in Machine Learning

The follow up document for the Addis Ababa Action Agenda is likely to be adopted in its final form at the UN General Assembly in September.
