guarantee programs for farmers and entrepreneurs in the MSME sector. Going forward, our national strategy for financial inclusion will entail community-based multi-stakeholder

models to overcome collateral issues and financial assistance for small and medium green enterprises (SMGEs) to promote commercial scale organic agriculture.

Sri Lanka has immense potential to channel development finance through active participation in **carbon emission trading**. Sri Lanka ranks as the second lowest carbon emitter with 0.4 metric tons of carbon dioxide emission per capita. Emission reductions can generate income
