Challenges of planning and financial ministries

Align forest sector goals with national planning for sustainable management cross-sectoral coordination

Identify necessary actions as / together with sector ministries

Discover where which financing is needed

Identify sources to respond to financing needs

Allocate funding efficiently creating impact

Financial planning – sequential steps

What financial flows and funding sources exist?
Where are conflicting flows from other sectors?

Which additional financing is needed to reach forest sector goals?
Which other sector finance needs to be addressed?

What sources are available and suitable?

How to allocate financing to recipient to create incentives and durable impact?

Do financing and allocation perform well?
