

Gateways to Public Digital Learning

A multi-partner initiative to create and strengthen inclusive digital learning platforms and content

UNESCO UNICEF

Objective and proposed actions

The main objective of the Gateways Initiative is to establish and technically support an international movement to ensure that every learner, teacher, and family can easily access, find, and use high-quality and curriculum-aligned digital education content to advance their learning.

In most contexts, content should be accessible via a national platform that is overseen, sustained, and improved with public resources. These platforms should be free for all users and complement and support teaching and learning that happens in school. They should also open avenues for self-driven education and lifelong learning.

The Gateways Initiative will further seek to help countries recognize and act on national, regional, and global possibilities to advance education through digital cooperation and solidarity. The internet allows unprecedented although currently underutilized possibilities for sharing, cooperation, and the pooling of resources that can benefit learners, teachers, and families within countries and also across them. This Initiative aims to maximize these collaborative actions.
