

SDG7 Energy Compact of TotalEnergies
A next Decade Action Agenda to advance SDG7 on sustainable energy for all, in line with the goals of the Paris Agreement on Climate Change

SECTION 1: AMBITION

1.1. Ambitions to achieve SDG7 by 2030.

<input type="checkbox"/> 7.1.	
-------------------------------	--

<input checked="" type="checkbox"/> 7.2.	Ambition to have developed a gross capacity of 100 GW of installed renewable power generation 2021-2030
------------------------------------------	------------------------------------------------------------------------------------------------------------

In 2020, TotalEnergies has set an ambition to get to net zero carbon emissions by 2050, from the production to the use of the energy products sold to its customers (Scopes 1, 2, 3), together with society. To support this ambition, the Company's strategy consists in transforming into a broad energy company, including by accelerating its growth in electricity and renewables. As part1.04 T8 0.447 0.769 rg0.267 0.447 0.769 RG[i]4(tsW*n po7 0.447 r

SECTION 2: ACTIONS TO ACHIEVE THE AMBITION

Description of action (please specify for which ambition from Section 1)

7.2 In order to support the ambition to have developed a gross capacity of 100 GW of installed renewable power generation by 2030, TotalEnergies

Outcome

In 2015, oil products accounted for 66% of our sales, gas 33% and electricity less than 1%.

In 2019, electricity represented already 5% of the Company energy sales mix.

By 2030, the Company's sales of oil products are expected to diminish by almost 30%, and TotalEnergies' sales mix will become 30% oil

each

Action 1:

SDG 1: supporting our host countries improve their energy mix towards lower carbon solutions that contribute to limiting climate change, by gathering \$ 60 billion of investments until 2030 for renewables and electricity (target 13.2)

SDG 9: developing resilient energy infrastructures that support a sustainable industrialization by investing on R&D to continue working on the smart deployment of cleaner energy, and developing sustainable energy infrastructures in several geographies, including developing countries.

SDG 11: allowing the deployment of low-carbon transportation powered with renewable electricity (target 11.2).

Action 2:

SDG 7: Our ambition doesn't not only contribute to advancing target 7.2 but also the other targets of SDG 7. The projects rely on international cooperation in R&D for access to renewable

SECTION 6: MONITORING AND REPORTING

TotalEnergies intends to provide an annual update on how its energy mix of production and sales is evolving by publishing its yearly ESG reports. In particular the Company publishes within its Universal registration document its non-
