

- g. Relationship between UN-Energy and many existing platforms led by external actors (e.g. the Global Covenant of Mayors for Climate and Energy) should be discussed as we move forward.
- h. The newly proposed platform on energy-health was welcomed and should strengthen collaboration among all actors, such as the Global Clean Cooking Alliance.
- i. Greening of the UN system is overdue and UN-Energy needs to call upon the leaders of UN entities to reduce the carbon footprint.
- j. Access and the principle of no one left behind should be an important pillar of UN-Energy.
- k. clarified in a pragmatic manner.

3- **Conclusions and next steps:**

All participants to send written suggestions to the two documents by Friday, 7 December.

The next call at technical level will take place on Monday December 17, 9-10am EST.

Due to scheduling issues there will not be a UN-Energy principals meeting at COP24 in Poland, but there may be one in Davos in January 2019 schedules permitting, details to be determined.
