STATEMENT BY

THE HONOURABLE SENATOR SHAERIZA LANDUZI

MINISTER OF WOMEN, FAMILY AND COMMUNITY DEVELOPMENT,
GOVERNMENT OF MALAYSIA

ON A GENDRA ITEM FOLLOWING TO THE FIFTH WORLD
CONFERENCE ON WOMEN AND TO THE TWENTY-THIRD SPECIAL
SESSION OF THE GENERAL ASSEMBLY, ENTITLED "WOMEN 2000:
GENDER EQUALITY, DEVELOPMENT AND PEACE FOR THE
TWENTY-FIRST CENTURY"

OF THE FIFTY-FIFTH SESSION OF THE COMMISSION ON THE

STATUS OF WOMEN

24 FEBRUARY 2001, UNITED NATIONS, NEW YORK

Isangolordusti. One billion of people a year has grown to 1000
billion. It is now about 1000 billion people. This is a significant
increase compared to the last time we met in New York. We must
work together to ensure that all women have equal opportunities
and rights to participate in the development process. We must
also work together to protect the environment and promote
sustainable development.

ก็มีลักษณะของคน,

On behalf of the Government and people of Malaysia, allow me at this time to extend my sincere congratulations to you on your appointment as the Chair of this session. I would also like to congratulate Ms. Michelle Bachelet on her appointment as the Under-Secretary-General and Executive Director of UN Women. We fully support the establishment of UN Women and are confident that it will strengthen the ability of the United Nations to carry out its mandate in achieving gender equality and the empowerment of women worldwide. We are honoured to be a member of the UN Women Executive Board and look forward to participating in the formulation of UN Women's Strategic Plan.

Chairperson,

2. Malaysia recognises that women's access to and participation in education and training, as well as science and technology, is essential to the development of a country. As indicated by the Secretary-General's report E/CN.1 Report L/2001/116, education is fundamental to economic growth and social change, and women's access to scientific and technological knowledge and skills is a rights issue, in as much as education is a basic human right. An essential part of education, science education contributes to human development by providing tools with which to make sense of the world and empowers individuals to make informed decisions related to other aspects of their lives.

3. Acknowledging the economic imperative of education, human capital, science, technology, and innovation, Malaysia has included the aspiration that the Prime Minister, the Right Honourable Dato' Sri Mohd. Najib Tun Abdul Razak, ~~the~~ ~~and~~ ~~the~~ ~~Government~~ ~~of~~ ~~the~~ ~~country~~, ~~in~~ ~~the~~ ~~development~~ ~~process~~ ~~of~~ ~~the~~ ~~country~~, ~~is~~ ~~responsible~~ ~~for~~ ~~the~~ ~~sustainable~~ ~~development~~ ~~of~~ ~~Malaysia~~. ~~Malaysia~~ ~~is~~ ~~a~~ ~~middle-income~~ ~~nation~~. ~~Under~~ ~~the~~ ~~concept~~ ~~of~~ ~~"My~~ ~~Malaysia"~~, ~~People~~ ~~First~~, ~~Economic~~ ~~Transformation~~, ~~the~~ ~~Government~~ ~~has~~ ~~introduced~~ ~~the~~ ~~transformation~~, ~~Plan~~, ~~Economic~~ ~~Transformation~~ ~~Programme~~, ~~New~~ ~~Economic~~ ~~Model~~ ~~and~~ ~~Tenth~~ ~~National~~ ~~Development~~ ~~Plan~~ (~~2011~~ ~~-~~ ~~2016~~). Under the latter, the Government of Malaysia is committed to increase the number of women in the workforce. As such, our national target is to increase the female labour force participation rate from 41.0 per cent presently to 55 per cent by 2015.

4. In this regard, I am ~~proud~~ ~~to~~ ~~inform~~ ~~you~~, ~~that~~ ~~the~~ ~~women~~ ~~of~~ ~~Malaysia~~ ~~are~~ ~~not~~ ~~excluded~~ ~~from~~ ~~this~~ ~~important~~ ~~process~~. My Ministry, the Ministry for Women, Family and Community Development was chosen as one of the lead agencies in the implementation of the National Key Results Areas (NKRA) under the transformation plan programme, i.e. to increase the income of poor households. The decision of the government clearly indicates its recognition and confidence in the Ministry to fulfil its mandate after the elimination of the hardcore poverty, ~~advise~~ ~~education~~ ~~ministry~~ ~~empower~~ the low-income households. Likewise, the NKRA pertaining to education is spearheaded by the Ministry for Education with the objective to bring up a higher level of education and better student performance, including

improvements in students' intellectual emotional spiritual and physical aspects.

5. In the area of science, technology and innovation, I am pleased to

inform you that although science was once a very much male dominated area, it is now being much taken up by women, and they are showing great enthusiasm and achieving high success. The Ministry of Science,

Technology and Innovation is now a highly creative Ministry, that has undergone considerable systematic and fundamental changes in

science, technology and innovation and to support a transformation of the economy into an innovative high income economy. I am proud to inform the Commission that the 3 top management positions of the Ministry are now being headed by women, and more than 50% of the second tier management are made up of women.

6. Realizing the importance of science, technology, and innovation as

the Year of Science and Creativity and 2014-2012 as the Year of Science with the theme, "Be Science, Love Maths". The campaign to instil the culture of innovation and creativity based on science and technology, eagerness and enthusiasm creatively to create a "1Malaysia.Innovative Nation". Taking into account, I am pleased to share with that, the Ministry of Women, Family and Community Development will form a strategic and innovative

alliance with the Ministry of Education as well as the Ministry of Science, Technology and Innovation in implementing programmes that can unleash their potentials, thus empowering women in science, technology and innovation. This is to ensure that women will continue to remain competitive and challenging world.

Chairperson

7. Notwithstanding the great inspirations and the immense effort that has been made in empowering women and girls in various fields fully and meaningfully in education, training, science and technology, experience has shown that these have not sufficiently translated into decent employment opportunities for women. Gender stereotyping has been a powerful, albeit insidious, influence on career choices. Therefore, the preconceived ideas, bigots,狭隘的观念 and mindsets that "men" tend to take are quite wrong. These should periodically be examined and have to change.

8. In Malaysia, effective measures have been taken to address these unequal and discriminatory scenarios. Empirical studies on our gender mainstreaming programmes show that most of our young school children, regardless of their backgrounds, are acculturated to acculturate gender equality mind-set.

Chairperson,

45. Malaysia recognizes that civil society, including non-governmental organizations (NGOs), play a vital role in complementing the efforts of the Government in the development process, in particular women. As a matter of fact, the NGOs are our strategic partners in implementing programmes to empower women. In this regard, funding for NGOs is provided within their budgeted funds to enable them to implement activities and programmes for the advancement of women.

Chairperson,

46. The Government of Malaysia reaffirms its commitment to enhance efforts to further improve the status of women and girls to enable them to reach their full potential to contribute towards the social and economic development of the country.

Thank you.
