

OVERVIEW

Guyana is located on the north eastern coast of South America. It is bordered to the east by Suriname, west by Venezuela, north by the Atlantic Ocean and south by Brazil.

With a population of 638,423 (1999),¹ women constitute 50.73% of the population. Geographically, Guyana is divided into ten regions for administrative purposes.² Guyana is endowed with natural resources, including gold, diamonds and bauxite.

Mineral resources, including gold, diamonds and bauxite, are found in the interior areas provide timber and mineral potential for economic activities.

There is considerable

of Guyana. Article 29 (1), is the recognition by the Government of the principle

Equality of women and men. This has also been enforced with the ratification of the Convention on the Prevention of Torture and Other Cruel, Inhuman or Degrade-

Since the declaration of the Decade for Women gender advocates have been examining women's position, trying to find ways for a more holistic approach for gaining major

achievements towards equality and women's development. Some of the achievements witnessed in a could be classified as legislative, policy and structural.

Legislation

In the realm of legislative achievement

1996 enables the police, social workers

There have been efforts in seminars, work

awareness of this strategy.

There is currently a greater recognition that women have a role to play in development and are making a meaningful contribution. By the same token, there is concern for the situation of boys and men, especially in relation to their education.

The Media

Change has not been significant especially with respect to the perception of the women in the media which continues to portray them in a negative mode.

Academic Institutions

Academic institutions have been addressing gender equality. Changes in the curriculum

have been made in order to ensure this. Students in the Faculty of Social Sciences at the University of Giverny are encouraged to select options in a series of courses designed

development projects will be sharpened. This should lead to leadership development and the empowerment of women. This partnership will address local needs within a comparative and global experience.

Other Departments of the University like the Institute of Distance and Continuing Education continue to attract to their programmes a significant number of women. The Open, Distance Learning and Development issues and the Open College of Education have addressed GUYADEV's concerns. In its curriculum offerings, programmes of the technical institute now feature an increased enrolment of women. NGOs, such as the Bahais, and the Adult Education Association of Guyana are offering courses dealing with issues of concern to women.

Women and Globalization/Structural Adjustment

GUYADEV has consistently argued that the current environment of open economies, new trade regimes and competitive industries tell significantly in favour of both waged and unwaged. Recent research has shown that protectionist economic policies contribute to the external debt crisis, and the human condition in negative ways. It has been the views of many developing countries that IMF conditionalities need to be modified in ways which will give consideration to the human dimensions of economic

adjustment. With globalization as with structural adjustment evidence shows an increase in poverty levels, the most disadvantaged being women, children and older persons.

The structural adjustment programme of the late 1980s brought untold hardships especially to women. Guyana has not escaped those hardships, the prolonged economic decline which lasted for about two decades has contributed to the country being rated in 1991 as one of the poorest countries in the Western Hemisphere. This drastic decline of Guyana's economic performance led to further adverse consequences. As a result, this crisis augmented poverty and the Guyanese society was plunged into extensive systemic poverty.

net income (as a measure of affordability) of a pre-determined minimum basket of goods) is used, 7.8% of the population

had incomes below the absolute poverty line

other factors contributed to a greater negative impact on women than men.

particularly single female parents and their families. Poverty therefore, for women, has a special gender related problems that have rendered them much more vulnerable than men in society. Special attention must also be given to the situation of older people,

the majority of whom are women.

The Women's Affairs Bureau and the National Commission on Women have a critical role to play in monitoring the impact of adjustment programmes and globalisation so that timely intervention can be taken where necessary.

Conclusion

Women's empowerment are central to development. The ability to create this awareness nation-wide in order to increase the capacity for social development is one of the main tasks of the Women's Affairs Bureau. The staff of this Unit should be increased to a level which would make intervention and programming match the needs of the female population which the Bureau is mandated to serve. As mentioned earlier, training and education should be intensified in order to ensure that women gain the necessary skills and confidence to pursue economic activities in the interest of national development.

It is important also that all stakeholders at the policy level be sensitized to be able to ensure that in their sectoral plans consideration is given to flexible forms of employment.

in the new millennium programmes for women will address this urgent need more effectively.

B: Institutional Measures

The passing of the National Policy for Women has paved

the way for two mechanisms to be put in place in order to give support to the National

Commission on Women and the Inter-Ministry

Ministry of Foreign Affairs plays a monitoring role through the setting up of inter-agency committees, comprising representatives of civil society and government to assist and report on follow-up actions. The National Commission on Women has responsibility

for the preparation of the country report to CEDAW.

- The Ministry's involvement across the range of institutional measures is integrated into its national agenda for women.

The Women's Affairs Bureau liaises with one hundred and five non-governmental organisations. Two staff, and also members of at least five national non-governmental organisations. There are also national committees comprising non-g

Access to credit is still out of the reach of many women. During 1996-1998 a new initiative, of the Commonwealth Youth Programmes in the establishment of a Small Business Credit Scheme. 50 women and 39 men have so far benefitted. Similar programmes are run by public and private agencies such as the Bank of Nova Scotia and the Institute of Private Enterprise Development (IPED)..

Though there has been improvement in women's representation at some levels of senior public office between 1993 and 1998, their numbers are still unacceptably low. At the level of Permanent Secretary there is a significant decrease in female representation from 1993 (33.3%) to 1998 (14.3%). This follows a trend of lower representation of women in higher Government office compared to previous years. There is on the other hand a positive indication of women overtaking their male counterparts in 1998 at the levels of and Assistant Secretary in Deputy Permanent Secretary, Principal Assistant Se

PART III

A. Development of improved services and future actions

The Government of Guyana, in consultation with key NGO's has prepared a draft 5 year Programme of Action, 1999-2003. The formation of relevant policies, programmes, projects and positive action is expected. The key agents for actions in this forth-coming period will be the Women's Affairs Bureau, the Guyana Women's Leadership Institute (GWLI), and the National Resource and Documentation Center, supported by appropriate NGO's and NGO's as well as the specialized United Nations agencies

In addition, it is expected that the Women's Affairs Bureau, supported by the National

recommendation of the Issue Papers commissioned in 1997/1998, a needs assessment statement as a basis for advising on policy formulation.

Awareness Creation

There is evidence of a gradual acceptance within the Government of the significance of mainstreaming. Women are becoming recognised as contributors to development, and representation on committees and Boards is being sought by

NGO's. To illustrate- The National Development Strategy Committee and the Constitution Review Committee 1998-1999;

Nevertheless, there is the on-going need for awareness creation in the nation, especially among groups.

We factor is the emergence of new groups such as the Kura Community Network, or the Purple Mountain Project across Differences (WAD), Community-based Organisations e.g.:

cipation of representatives of some women's organisations on Committees
responsible for drafting the National Development strategy provided opportunity for

process and/or image learning vehicle...

This has been approved by the Cabinet

B. Obstacles to be overcome are:

1. The own constraints for lack of adequate man and financial resources continue to be a limitation for the establishment of effective institutional mechanisms. Acknowledging this limitation, it becomes imperative for the Women's Affairs Bureau to address this problem creatively.
2. Weak and infrequent liaison with support agencies, both government and non-government.
3. Inadequate co-ordination with relevant NGO's to support implementation of programmes and projects.
4. Non-existence of a national umbrella women's organisation.

New areas/commitment

1. Analysis of the budgetary provisions at national level which benefit women.
2. Programs to address the situation of indigenous women and women with disabilities.
3. Strengthening the liaison with Ministry of Health and Ministry of Education in terms of mainstreaming gender in policy and programmes.

Targets

1. A strengthened Women's Affairs Bureau
2. A stronger commitment to the National Thrust for Women.
3. Coordination of Human, Financial and Technical support for Women's Programmes.

Priority Areas of Concern

1. Women and Poverty
2. Women and Health
3. Human Rights of Women
11. Women and the Environment
12. The Girl Child

General Comments

In 1997-1998, the National Commission on Women, in terms of its support to the project, the Women's Affairs Bureau (WAB), commissioned issue papers on the priority areas of concern listed above. These papers were to provide the Bureau with information for policy and programme formulation. In addition, the project, which was funded by the CARICOM Gender Equity Project (CCGEP), provided for the circulation of the information on the Issue Papers through the conduct of

(a) round-table discussions with women's groups in rural and urban hinterland areas, involving government officials, NGOs, local policy trainers and representatives of key agencies;

(b) a high-level Seminar for senior agencies; and

(c) dissemination of the issue paper related to gender and development.

In the implementation of the round-table discussions, the problem encountered was in finding time to attend the sessions. Much time is needed to ensure attendance.

In the implementation of the seminar, the problem encountered was in relation to attendance at the sessions. Many

high level seminar, was very disappointing.

Secretaries

most important calling for public education programmes for women and men, and targeting the Police Force and the legal practitioners at all levels of the judicial system. Initial educational programmes for officers and ranks of the Police Force have been conducted on funds provided by Canada CARICOM Gender Equity Fund (CCGEF). A special booklet on the Domestic Violence Act has been prepared by The Red Thread, a NGWO.

Commission on Women (NCW) addressed the issue of Women's Rights as Human Rights, requesting provisions relating to recognition of the unwaged labour of women.

The Girl Child

Government has ratified the Convention on the Rights of the Child.

Institutional Mechanism for the Advancement of Women

The National Policy on Women was approved by Parliament in 1996. An important feature of that policy was the establishment of

- A National Commission on Women
- The establishment of the Inter-Ministry Committee
- The policy also indicated approval of the strategy of mainstreaming gender in all Government policies and programmes.

The national focal point, designated the Women's Affairs Bureau, was established in 1981. It currently functions within the Ministry of Human Services and Social Services.

The National Commission on Women has responsibility for maintaining a national dialogue on issues of concern to women, for advising the Minister of Human Services:

and Social Services on gender policies and programmes to address the issues, to review and update the Women's Affairs Bureau's programme implementation and draft Report to UN/CEDAW on the status of the programs in Guyana.

The Inter-Ministry Committee has responsibility for technical and professional support to Women's Affairs Bureau and to support relevant measures for mainstreaming gender in the ministries represented on the Committee and in Government agencies as a whole.

An evaluation of the functioning of these two bodies would reveal an acceptable level of fulfilment of their terms of reference, but more in-depth knowledge of issues, and greater participation would enhance that level of achievement.

The Government of Guyana, on funding accessed from the UNDP, has implemented the project titled "Building Capacity for Gender in Governance".

This project has seen the establishment of two institutions, namely the Guyana Women's Leadership Institute and the National Resource and Documentation Center. This project which is currently in its implementation phase has the potential for significantly enhancing the leadership capability of Guyanese women, and of providing an improved information base for on-going programme formulation.

Since Beijing 1995, efforts have been made to strengthen the Regional Women's Affairs

Committee established in 1986. The Committee comprises representatives of Non-Governmental Women's organisations and agencies in each Region.
